

# IRPS-UNAM School of Medicine RegPep-2019 Workshop: *Peptide regulation in systems biology and its translational opportunities*

*Last August 9 at the School of Medicine of the National Autonomous University of Mexico (UNAM), we held the RegPep-2019 Workshop: Peptide regulation in systems biology and its translational opportunities.*

*Valery Grinevich, Lee Eiden, Andrew Gundlach, Mary Lee, Duan Chen, André de Sousa Mecawi and Ruud Buijs presented their work on neuropeptides and peptide hormones. The event was attended by researchers in training, residents and clinicians. Sixty students were awarded a scholarship by the UNAM to attend Workshop.*

*The event allowed the audience to acquire knowledge and share information about recent findings in the field of regulatory peptides and to interact with international scientists. Once the workshop was over, the participants received a certificate and had the opportunity for further discussion with the speakers at an informal lunch.*
